Profile

As a Perl developer, I'm looking for challenges every day. I love open source project, and I contribute to the Perl community.

Skills

Project Leader

I manage the Adperf Publisher Team for one of the biggest product of Weborama.

Web Advertising

I deal with huge amount of traffic for serving ads on our network of thousand of website around Europe.

Community developer

I love sharing my experience and purpose my personal development to the community.

Technical

Perl	MySQL	NGinx
Ruby	Redis	Apache
Javascript	Riak	Ubuntu / Debian / FreeBSD
SQL	IBM DB2	Git / SVN
Shell	Postgresql	
HTML / CSS		
PHP		
Python		

Experience

Weborama

2008-2012

Project leader and Perl senior developer

I lead the Adperf Publisher Team, a product dedicated to the publishers that handle their advertising. I have to deal with huge amount of traffic and I optimize all part of the product (the queries and the codes).

UTI-Group

2005-2008

Perl junior developer

I fixed bugs and improved the OPTIMA product. I highly optimize queries (IBM DB2) and Perl code. I have designed and developed the extranet software wrote in PHP/MySQL. I also developed a solution of reporting in javascript / Java Jasper.

Solintech

2003-2005

Co-Fonder of the enterprise

We created solutions for the enterprises that manage their services (web, mails, databases...). For instance, we have built a secure embedded system with a web interface.

Education

DEUG MIAS
