Profile

As a Perl developer, I'm looking for challenge every day. I love open source project, and I contribute to the Perl community.

Skills

Project Leader

I manage the Adperf Publisher Team for one of the biggest product of Weborama.

Web Advertising

I deal with huge amount of traffic for serving ads on our network of thousand of website around Europe.

Community developer

I love sharing my experience and purpose my personal development to the community.

Technical

Perl	MySQL	NGinx
Ruby	Redis	Apache
Javascript	Riak	Ubuntu / Debian / FreeBSD
SQL	IBM DB2	Git / SVN
Shell	Postgresql	
HTML / CSS		
PHP		
Python		

Experience

Weborama
Project leader and Perl senior developer   2008-2012

I lead the Adperf Publisher Team, a product dedicated to the publishers that handle their adserving. I have to deal with huge amount of traffic and I optimize all part of the product (the queries and the codes).

UTI-Group
Perl junior developer   2005-2008

I fixed bugs and improved the OPTIMA product. I highly optimize queries (IBM DB2) and Perl code. I have designed and developed the extranet software wrote in PHP/MySQL. I also developed a solution of reporting in javascript / Java Jasper.

Solintech
Co-Fonder of the enterprise   2003-2005

We created solutions for the enterprises that manage their services (web, mails, databases...). For instance, we have built a secure embedded system with a web interface.

Projects SCK
I have made a service to shorten urls wrote with Dancer, Plack, NGInx, Redis. It support API and it is included on Android URLy application and on my Drupal blog.
http://sck.to

Administer servers
I have a server with ESXi and a lot of virtual machines, most of them on Linux to handle all my websites. I like to deal with desktops and servers on Linux OS.
